The asterisk (*) preceding the page number indicates an original article in the Archives. Subject entries are made for all articles. Author entries are made for original articles and society transactions. Book Reviews, Obituaries and Society Transactions are indexed under these headings in their alphabetical order under the letters B, O and S, respectively.

- Abdomen**, actinomycosis of liver with involvement of abdominal wall, 427
- Abnormalities**: See Twins; etc.; and under names of organs and regions, as Aorta, abnormalities; Heart, abnormalities; etc.
- Abscess**: See under names of organs and regions, as Lungs, abscess; etc.
- Acid, Amino**: See Amino-acids
- production of intimal changes in arteries attempted in rat by prolonged feeding of aceto-acetic acid, *543
- Actinomycosis**, *Bacterium necrophorum* in chronic ulcerative colitis, 416
- of liver with involvement of abdominal wall, 427
- Adams, M.**: Association of anoxemia with experimental hepatic lesions, particularly those induced by toluendiamine, 288
- Adenocarcinoma**, anaplastic carcinoma of major vestibular (Bartholin's) gland, 719
- further studies on carcinoma of kidney in frog, 280
- Adenoma**, congenital racemose bronchial adenoma of right eparterial bronchus with pulmonary agenesis of right upper lobe, 269
- islet adenoma in pancreas of mouse, *220
- Adipose Tissue**: See Fat; Obesity
- Adolescence**, interstitial cell tumor of testis with hypergenitalism, 860
- Adrenals**, medulla and cortex in relation to effects of insulin, 283
- morphology of adrenal cortex, 848
- specific granulation of chromaffin cells of pheochromocytoma, 712
- Aedes**: See Encephalomyelitis, equine
- Agglutination**, decomposition of group-specific substance by bacteria, 265
- elimination of blood group factor in saliva with gastric juice, 559
- group specific A substance in horse saliva, 853
- so-called blood group enzyme, 857
- so-called blood group ferment in saliva, 858
- thermal range of group-specific antisera, 710
- thermal range of typhoid immune sera, 559
- Agglutinins**: See also under Antigens and Antibodies; Blood, groups; Immunity; Mononucleosis, infectious; Pneumococci; Pneumonia; etc.
- and conditioned reflex, 854
- for sheep and rabbit erythrocytes in human serum, 854
- Agglutinogens**: See Agglutinins; Blood, groups; Smallpox, vaccination; Typhoid
- Albumin**: See Blood, proteins; Protein; etc.
- Alcohol**, absorption after ingestion of food, 423
- in Blood: See Blood, alcohol
- Alkali, disease**; selenium poisoning, *398
- Allen, F. M.**: Duration of asphyxia tolerated by various organs; local and general effects, 277
- Allergy**: See Anaphylaxis and Allergy
- Amebiasis**, dysentery caused by *Shigella dysenteriae* of slow lactose-fermenting type, 564
- American Board of Pathology**, organization, 550
- Amino-acids**, serologic tests with, 855
- Amino-azotoluene**, latent period in experimental carcinogenesis, 279
- Amniotic fluid concentrate** as activator of peritoneal immunity, 413
- Amyloid Substance**, chemical composition of prostatic corpora amyacea and calculi, *41
- morphology of prostatic corpora amyacea and calculi, *24
- Amyloidosis** of cerebral vessels, 704
- of thyroid and other viscera in patient with chronic bronchiectasis, 269
- Anaphylaxis and Allergy**: See also Arthus phenomenon; Asthma; Food, allergy; Tuberculosis, allergy in; etc.
- cutaneous allergy and complement fixation test in diagnosis of infestations with trematodes, 265
- experimental allergic inflammation of meninges, 701
- hyperergic inflammatory reaction of denervated tissue, 552
- importance of allergy and immunity due to Ghon tubercle in pathogenesis of experimental pulmonary tuberculosis, *99
- influence of anaphylactic shock on finer structure of liver in dog, 118
- inhibition of Schwartzman phenomenon, 708
- local skin reactivity to bacterial filtrates, 557
- nature of postanaphylactic state in guinea-pigs, 125
- pneumococcal allergy, anaphylaxis and immunity, 710
- relative importance of reticulo-endothelial tissues and circulating antibody in immunity, 418
- sheep and rabbit cell agglutinins in horse serum sickness and infectious mononucleosis, 854
- Anemia**, experimental gastrectomy, 413
- experimental, in monkeys, 256
- pernicious; elimination of blood group factor in saliva with gastric juice, 559
- relation of disease of liver to, 846
- Anesthesia and blood lipids**, 120
- comparative studies on traumatic shock produced experimentally under ether and under sodium amylal anesthesia, 282
- Angioma**; angiomatosis of breast, 863
- Anhydrase**: See Blood, enzymes
- Anoxemia**: See Blood, oxygen
- Antibodies**: See Antigens and Antibodies
- Antigens and Antibodies**: See also Agglutinins; Immunity; Lipoids; Precipitin
- absorption of antibodies from syphilitic and tuberculous serum, 419
- antigenic action of phosphatides (cephalin), 125
- antigenic properties of globins, 419
- heterophil antibody test in leukemia and leukemoid conditions, 122
- nature of antibodies in serum of patients with infectious mononucleosis, 130
- nature of heterophilic antibodies in infectious mononucleosis, 708
- of tapeworms, 265
- purification of antibodies in type I anti-pneumococcus serum and chemical nature of type-specific precipitin reaction, 418
- relationship of circulating antibody to local inflammatory reaction to antigen (Arthus phenomenon), 263
- relative precipitin response of various breeds of rabbits, 121
- Antiseptics**, certain hydroxy-alkyl-benzene antiseptics, 286
- Antiserum**: See under names of various diseases
- Antistreptolysin**: See Streptococci
- Antitoxin**: See under Diphtheria; etc.

INDEX TO VOLUME 22

- Aorta**, abnormalities; cor triloculare biven-
tricular with dextroposition of aorta and
pulmonic stenosis, 721
changes in experimental open pyopneumo-
thorax, 846
chemical analysis of atherosclerotic lesions in
human aorta, 119
lesions in roots of pulmonary artery and aorta
in rheumatic fever, 414
Thrombosis: See Thrombosis
- Aortic Valve**, calcific sclerosis of aortic valve
(Mönckeberg type), *477
syphilis; *Treponema pallidum* in syphilitic
aortic valvulitis, 848
- Aortitis**, bacterial endocarditis without valvular
lesions, 564
thrombosis of aorta and coronary arteries with
reference to "fibrinoid" lesions, *183; cor-
rection, 582
- Apoplexy**: See under Brain
- Apparatus**: See also Instruments
autopsy table of compact and convenient de-
sign, *548
perforated cup for dehydration of tissues with
dioxane, *389
- Appendix**, cancer; argentaffin tumor in pregnant
woman, 424
mucocele of, 425
- Arsenic** as etiologic agent in certain types of
carcinoma, 860
- Arteries**: See also Aorta; Arteriosclerosis;
Blood pressure; Blood vessels; Embolism;
Periarteritis; Thrombosis
coronary; vascularization and hemorrhage of
intima of arteriosclerotic coronary arteries,
*313
effect on monkeys of small doses of concen-
trated preparation of viosterol, *1
genesis of intestinal infarction following em-
bolization of superior mesenteric artery, 755
inflammation; chronic pulmonary arteritis in
schistosomiasis Mansonii, 414
mesenteric vascular occlusion of arterial and
of venous origin; report of 9 cases, *637
production of intimal changes attempted in rat
by prolonged feeding of aceto-acetic acid,
*543
pulmonary; lesions in roots of pulmonary ar-
tery and aorta in rheumatic fever, 414
pulmonary, myoplastic sarcoma of, 713
- Arteriosclerosis**, calcific sclerosis of aortic valve
(Mönckeberg type), *477
capillary circulation to atherosclerotic lesions,
698
chemical analysis of atherosclerotic lesions in
human aorta, 119
experimental atherosclerosis, further investi-
gations, *293
human atherosclerosis in relation to chole-
sterol content of blood serum, *301
nature of experimental cholesterol arterioscle-
rosis in rabbit, *161
plastic studies in abnormal renal architecture;
vascular and parenchymal changes in arte-
riosclerotic Bright's disease, *435
thrombosis of aorta and coronary arteries with
reference to "fibrinoid" lesions, *183; cor-
rection, 582
vascularization and hemorrhage of intima of
arteriosclerotic coronary arteries, *313
- Arteritis**: See Arteries, inflammation
- Arthus phenomenon**, relationship of circulating
antibody to local inflammatory reaction to
antigen (Arthus phenomenon), 263
- Aschheim-Zondek Hormone Test**: See Pituitary
Body
- Aschoff Body**: See Rheumatic Fever
- Asphyxia**, duration tolerated by various organs;
local and general effects, 277
- Asthma**, pathologic changes in asthmatic infants,
117
- Atherosclerosis**: See Arteriosclerosis
- Autopsies**, autopsy table of compact and con-
venient design, *548
- Avitaminosis**: See under Vitamins
- Azoprotein**: See under Protein
- B C G**: See under Tuberculosis
- Bacilli**: See Bacteria
- Bacteria**: See also under Meningococci; Pneu-
mococci; Staphylococci; Streptococci; Tu-
bercle Bacilli; Typhoid, bacilli; Viruses;
etc.
abortus and mellitense group; iso-electric zones
of *Eberthella typhosa* and *Brucella abortus*
agglutinins, 122
abortus and mellitense group; polysaccharide
constituent in *Brucella* cells, 709
bacterial endocarditis without valvular lesions,
564
bacterial nutrition, 261
bactericidal action of bovine whole blood and
serum toward *Brucella*, 855
decomposition of group-specific substances by,
265
Diphtheria: See Diphtheria, bacilli
Eberth's: See Typhoid, bacilli
lactic acid bacilli from vagina, nursing's in-
testine and teeth, 706
Necrophorus: See Actinomycosis
preservation by drying in vacuo, 713
pyocyaneus; malignant endocarditis caused by
Bacillus pyocyaneus; report of case, 131
relation of certain coccobacilli-form bodies to
infectious coryza of fowls, 288
relative importance of reticulo-endothelial tis-
sues and circulating antibody in immunity,
418
Shiga: See Dysentery
studies on inflammation, 256
- Bacteriophage**, carriers among bacteria, 417
- Bacterium**: See Bacteria
- Ball, H. A.**: Coccidioid granuloma; pul-
monary lesion of 4½ years' duration, 567
- Bartholin's gland**, anaplastic carcinoma of
major vestibular (Bartholin's) gland, 719
- Basophilism**: See Pituitary Body, tumors
- Beazell, J. M.**: Chronic gastric ulcer following
bilateral vagotomy in rabbit and in dog,
*213
- Belding, D. L.**: Seasonal variations in human
spermatozoa, 273
- Benzanthrane**, di-benzanthracene tumors in
controlled strains of mice, 860
latent period of experimental carcinogenesis,
279
production of sarcoma by solution of 1:2:5:6-
di-benzanthracene, 561
protective action of sulphydryl against carci-
nogenesis induced with 1, 2, 5, 6-di-benzan-
thrane, *55
- Benzene**, certain hydroxy-alkyl-benzene antisep-
tics, 286
- Berg, B. N.**: Adrenal medulla and cortex in
relation to effects of insulin, 283
- Berger, A. R.**: Hemorrhagic extravasations into
leaflets of atrioventricular valves; their re-
lationship to pulmonary embolism, *524
- Bergstrom, V. W.**: Lymphosarcoma of testes,
425
- Bethell, F. H.**: Changes in blood during preg-
nancy, 282
- Bile Ducts**: See also Biliary Tract; Gallbladder
hepatic changes on injection of sodium dehy-
drocholate in cats with total bile stasis,
*373
liver regeneration and biliary obstruction, 848
tubular tuberculosis of liver, *743
- Biliary Tract**: See also Bile Ducts; Gallblad-
der; Liver
calculi; examination of urinary and biliary
concrements by use of ultraviolet rays, 260
- Birge, R. F.**: Primary liposarcoma of great
omentum, *823
- Blakely, K. D.**: Perforated cup for dehydration
of tissues with dioxane, *389
Use of dioxane in preparation of histologic
sections by paraffin method, *225

INDEX TO VOLUME 22

Blastomycosis, experimental chronic cutaneous blastomycosis in monkeys, 556
 Blood: See also Hemoglobin; Leukocytes; etc.
 alcohol; changes in alcohol content of cadaver blood and of blood samples preserved without sterile precautions, 423
 bactericidal action of bovine whole blood and serum toward *Brucella*, 855
 cells; hemocytic constitution of rabbit as index of its natural resistance to malignant tumors, 275
 changes during pregnancy, 282
 cholesterol; human atherosclerosis in relation to cholesterol content of blood serum, *301
 coagulation by proteolytic enzymes, 286
 demonstration of thyrotropic material in blood and urine of patients with myxedema, 273
 Diseases: See Anemia; Leukemia; etc.
 enzymes; carbonic anhydrase content of blood in pathological states in man, 415
 fats and lipoids; anesthesia and blood lipids, 120
 fats and lipoids; effect of total removal of liver on blood fats, 285
 fats and lipoids; plasma lipids in purpura produced with antiplatelet serum, 120
 formation; micrometabolism of lymphocytes; its relationship to concepts of blood formation, 285
 groups and disease, 265
 groups and heredity, 559
 groups; determining group of human blood-stains; notes on anomalous group O serum, 268
 groups; distribution of blood group specific substances and blood group enzymes in gastro-intestinal tract, 708
 groups; human blood group factor, 120
 groups, occurrence of weak factor in adult, 121
 groups, properties in rabbit, 710
 influence of repeated injections of blood and of splenic extract on leukocyte count of rabbit, 701
 oxygen; association of anoxemia with experimental hepatic lesions, particularly those induced by toluendiamine, 288
 phosphatase in various types of jaundice, 259
 pigments, local formation of, 702
 platelets; action of staphylococcus secretions, 857
 pressure, effect of renal denervation on blood pressure in experimental renal hypertension, 551
 pressure, effect of staphylococcus toxin on dog's blood pressure, *806
 pressure, high; arterial hypertension; response in blood pressure and blood sugar to insulin-induced hypoglycemia, 285
 pressure, high; intestinal necrosis in hypertension and uremia, 704
 proteins, changes in multiple myeloma, 562
 proteins, effect of injury on level of, 260
 proteins in dog with Eck fistula, 284
 proteins; nutritional edema in dog, 551
 serologic differentiation of 2 species of guinea-pigs, 120
 studies of serum electrolytes; blood changes following death from contact with alternating current of high intensity, *738
 sugar; arterial hypertension; response in blood pressure and blood sugar to insulin-induced hypoglycemia, 285
 sugar; nature of postanaphylactic state in guinea-pigs, 125
 transfusion accidents from medicolegal standpoint, 268
 transfusion, hemolytic reaction with oligura, 123
 vessels; local skin reactivity to bacterial filtrates, 557

Blood—Continued

vessels; plastic studies in abnormal renal architecture; vascular and parenchymal changes in arteriosclerotic Bright's disease, *435
 Bogen, E.: Early renal tuberculosis; report of case, 563
 Bollman, J. L.: Association of anoxemia with experimental hepatic lesions, particularly those induced by toluendiamine, 288
 Fatty condition of liver produced by alcohol and diet rich in fat, 283
 Bones, changes in chickens with artificially produced osteitis fibrosa, 552
 Diseases: See also Osteitis; etc.
 marrow, lymphadenosis of, 712
 metastasis in carcinoma of stomach, 560
 osseous metastasis of carcinoma of prostate with reference to perineural lymphatics, *139
 study of osseous system in case of Hand-Schüller-Christian's disease, 555

 atrophy; late infantile amaurotic idioy with marked cerebral atrophy, 117
 blood supply; anomalies of circle of Willis with resulting encephalomalacia and cerebral hemorrhage, 258
 calcification, extensive, 119
 crossed atrophy of cerebellum, 118

INDEX TO VOLUME 22

- Brain—Continued**
 cystic tumor of third ventricle with colloid-like content, 725
 ependymoblastoma in fourth ventricle with new bone formation, 129
 growth of Rous sarcoma inoculated into brain, 859
 pulmonary embolus containing cerebral tissue, *113
Breast, angiomatosis of, 863
 cancer, in inbred stock of albino mice, 127
 cancer, internal secretions as cause of, 277
 cancer; normal estrous cycle and response to estrin in 2 strains of mice differing greatly in incidence of spontaneous mammary cancer, 267
 cancer; relation between mammary cancer and sexual cycle in mice, 859
 cancer; susceptibility to cancer development in skin and in mammary gland in 2 lines of inbred mice, 126
 cancer, traumatic, 129
 development of mammary glands of virgin female mice of 10 strains varying in susceptibility to spontaneous neoplasms, 421
 fatty tissue tumors of, 127
 tumors; estrous cycles of mice with spontaneous mammary tumors, 421

Burns, E. L.: Internal secretions as cause of cancer, 277
Cadavers, changes in alcohol content of cadaver blood and of blood samples preserved without sterile precautions, 423
Calsson disease, histologic study of late lesions, *86
Calcification: See also under Brain; etc.
 calcific sclerosis of aortic valve (Mönckeberg type), *477
Calculi: See Biliary Tract, calculi; etc.
Cancer: See also Adenocarcinoma; Sarcoma; Tumors; etc.; and under names of organs and regions, as Appendix, cancer; Breast, cancer; Duodenum, cancer; Kidneys, cancer; Liver, cancer; Lungs, cancer; Stomach, cancer; etc.
 at early ages, 862
 carcinogenesis in rats, 711
 carcinogenesis; isomers of cholanthrene and methylcholanthrene, 278
 diagnosis by exact chemical measurements, 861
 di-benzanthracene tumors in controlled strains of mice, 860
Cancer—Continued
 diffusely infiltrative carcinoma; hitherto undescribed correlation of several varieties of tumor metastasis, *674
 effect of immune serum on transplantable Flexner-Jobling rat carcinoma, 722
 effect of screened radon on mitosis, 281
 flocculating power of cancer serum, 861
 Fuchs cancer reaction, 862
 general pathologic conception of, 266
 latent period in experimental carcinogenesis, 279
 precancer; arsenic as etiologic agent in certain types of carcinoma, 860
 protective action of sulfhydryl against carcinogenesis induced with 1, 2, 5, 6-di-benzanthracene, *55
 quantitative study of growth of Walker rat tumor and Flexner-Jobling rat carcinoma, 127
 significance of abnormal mitosis in development of malignancy, 127
 somatic, and state of interstitial cells of testicle, *470
 susceptibility to development in skin and in mammary gland in 2 lines of inbred mice, 126
 tar; production in rabbits due to administration of tobacco tar, 562
 tar; rate of tumor induction by tar in mouse at different sites in skin, 421
